## Job description:

- Experiments design and execution
- Tissue culture and molecular biology
- Writing reports, summarizing and presenting results
- Collaboration with industry/biotech companies
- Supporting and guiding students and workers.
- Time requirement: 100%

## Requirements:

2nd degree in life sciences

Experience with:

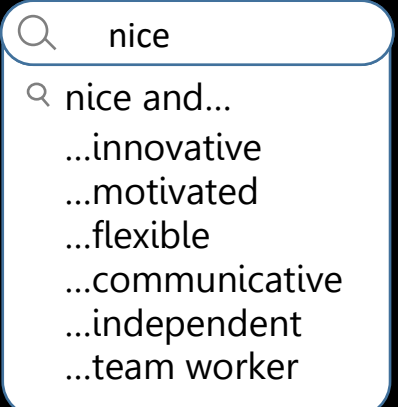

- ✓ Tissue culture work
- ✓ Team management

## Nice to have-

- ⇒ Work experience in the food-tech or alternative proteins field
- ⇒ PhD an advantage

## What is the consortium?

About the lab: we are located in Rehovot. We work on stem cells and are currently focused on using the tools we have to develop and optimize their use for cultured meat production.
